

Poland Springs Academy,

We were so glad to find out about Poland Springs Academy. From our first contact with Robbie onward we were impressed with the ideals, goals, and accomplishments of Poland Springs Academy. As it turned out, this was exactly what Bonny needed. This program drew her in and she wanted to succeed and to participate. The help she received was positive and raised her self-esteem and gave her direction.

Bonny has been in different programs and the end result did not come close to the results she was able to accomplish at Poland Springs Academy. I do not know about other individuals and their situations but this program worked for us. The staff was so good at working with us in different areas of concern. They provided logical solutions that all could agree on.

The public school system could not or would not address Bonny's situation. The public school system tried various programs with different teachers, some very good, to no avail. We had just about given up and thought there was no help. We especially wanted Bonny to get her high school diploma. Bonny is receiving her high school diploma.

We would recommend this program to anyone and especially to those that have children with special circumstances and needs that cannot be addressed in the public school system. You can feel free to use us as a reference.

Thank You
